

Certified Information  
Systems Security Professional

In an increasingly complex cyber world, there is a growing need for information security leaders who possess the breadth and depth of expertise necessary to establish holistic security programs that assure the protection of organizations' information assets.

CISSP is the most globally recognized certification in the information security market. Required by the world's most security-conscious organizations, CISSP is the Gold Standard credential that assures you have the deep technical and managerial knowledge and experience to effectively design, engineer, and manage the overall security posture of an organization.

Backed by (ISC)<sup>2</sup>, the globally recognized, not-for-profit organization dedicated to advancing the cyber, information, software, and infrastructure security field, the CISSP was the first credential in the field of information security to meet the stringent requirements of ISO/IEC Standard 17024.

CISSP  
IS THE  
GOLD  
STANDARD  
CREDENTIAL

ISO/IEC 17024
